

Assignment 4:

1. What does HTML stand for?

HTML stands for **HyperText Markup Language**. It is used to create and structure web pages.

2. What is the difference between a Tag and an Element?

A **Tag** is the markup enclosed in angle brackets, such as `<p>`.

An **Element** includes the opening tag, content, and closing tag, such as `<p>Hello</p>`.

3. What is an Attribute?

An **Attribute** provides additional information about an HTML element. It is written inside the opening tag, for example: ``.

4. What is Semantic HTML?

Semantic HTML uses meaningful tags like `<header>`, `<nav>`, `<article>`, and `<footer>` to clearly describe the content and improve accessibility and SEO.

5. Why is the alt attribute important for images?

The **alt** attribute provides alternative text for an image if it cannot be displayed. It also helps screen readers describe images to visually impaired users.
